

comprehensive design, construction & project management

Headed by its founder and Managing Director, Vaughn Henry, MAXAM is the ultimate market solution, providing comprehensive construction services and offering a team with more than 15 years of industry experience.

The company mission revolves around four core values: absolute integrity, product quality, outstanding service and social enterprise – all of which stem inherently from MAXAM's people. MAXAM's business is propelled by offering a comprehensive design, construction and project management service which exceeds the value and quality of any other company.

"All too often developers are at the mercy of construction groups who don't plan for every aspect of the project. MAXAM adds intangible value to its clients under one enterprise 'umbrella'. Although it may not be immediately apparent to the client – other companies will have to double their efforts, or increase prices with variations, before completion, to produce the same end-results. MAXAM's intuitive industry experience and drive for client satisfaction ensures you get the job done right, first time, every time."

- Vaughn Henry, Managing Director

PROJECT SPOTLIGHT

Ikin Store It - Townsville

Located on the major double lane arterial road of Woolcock Street Townsville with easy access to the airport, rail, highways and support services, the location is described as a prime landmark position. The volume of passing traffic, visibility and close proximity to major new retail centres were choice factors in the site selection

Bustech - Burleigh Gardens

Manufacturing facility with an additional admin building, caretakers residence and all required amenities

Complete Self-Storage - Coorparoo

When we decided to construct our complete self storage facility we were looking for a construction contractor who would meet the unique needs of a facility that featured 800 individual storage sheds.

"...we are the proud owners of an eye-catching complex that is beyond even our expectations."
